

From Zero to Enterprise-Deployable OutSystems Developer in 8 Weeks

Build real enterprise applications using OutSystems, Agentic AI, and cloud integrations – not tutorials, **real systems**.

4 Real Enterprise Projects
Not dummy apps. Production-grade builds.

AI + Cloud + Integrations
One cohesive, enterprise-ready programme.

Real Agile Development
Build like professional teams do.

Portfolio + Interview Ready
Walk out deployable and confident.

⚡ Limited seats. Only serious developers. Next batch may not open for months.

Is This For You?

This programme was designed with one intent – to turn ambitious developers into enterprise-deployable professionals. Know exactly where you stand before you apply.

✓ This Is For You If...

- You're switching to low-code / OutSystems and want a fast-track path
- You're a fresher who wants **job-ready skills**, not theory
- You're stuck at tutorial-level knowledge with no real project experience
- You want enterprise exposure that recruiters actually care about

✗ This Is NOT For You If...

- You're looking for shortcuts or passive video consumption
- You're not willing to build real projects under pressure
- You expect only recorded content with no live accountability
- Career growth isn't an immediate priority for you

What You Will Get

Three outcome buckets. Every single deliverable is tied to real-world enterprise value – not checkbox learning.

BUILD

- 4 Real Projects – 2 mid-tier + 2 enterprise capstones
- Agentic AI application end-to-end
- Enterprise-grade system design
- Portfolio-ready, deployable applications

LEARN

- OutSystems ODC + OS11 (both platforms)
- Agentic AI integration with OpenAI
- Azure Blob, REST APIs, SQL Server
- PDF & JS-based enterprise reporting

GET HIRED

- Mock interviews with real feedback
- Resume + project documentation support
- 1-on-1 career guidance session
- Real-world development exposure on record

The 8-Week Learning Journey

Every phase ends with a real build. **No passive learning. No filler weeks.**

1

Week 1–2: Foundations & First Build

- OutSystems ODC core: UI patterns, data entities, logic flows
- Core exercises: forms, validations, role-based screens
- Agile workflow: user stories, sprint planning, task tracking
- 🏠 **Project Delivered: OmniShelf – Warehouse Inventory Reconciliation Tool**

2

Week 3–4: Advanced OutSystems + Agentic AI

- Advanced OutSystems: timers, BPT, complex integrations
- OpenAI API integration + prompt engineering for enterprise use
- Building AI-driven workflows with real business logic
- 🤖 **Project Delivered: Agentic AI Business Intelligence App**

3

Week 5–6: Cloud, REST APIs & Integration Capstone

- Azure Blob Storage, SQL Server connectivity
- REST API design, consumption, and error handling
- JS + PDF-based enterprise reporting engine
- ☁️ **Project Delivered: Cloud Integration & Reporting Platform**

4

Week 7–8: Architecture, Capstone & Career Prep

- Enterprise system design patterns and scalability
- Full capstone build: end-to-end enterprise application
- Mock interviews, resume review, portfolio documentation
- 🚀 **Project Delivered: Full Enterprise Capstone System**

4

Enterprise Projects Built

8

Weeks of Live Mentorship

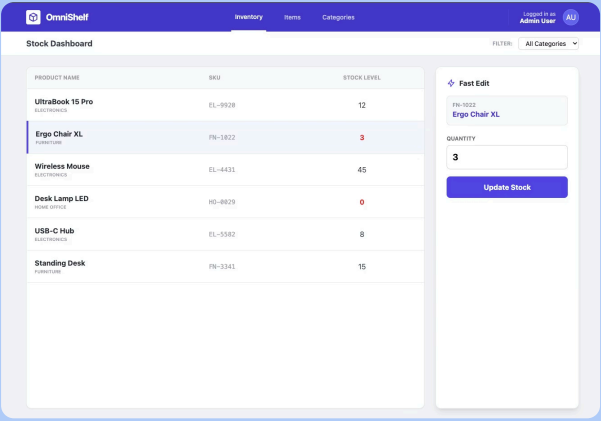

100%

Hands-On, No Filler

📌 Every week is structured around building – not watching. You leave each phase with working software.

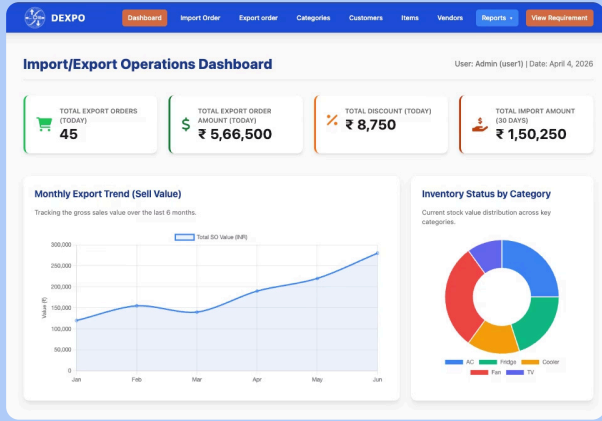

Project Showcase

Real builds from the programme — production-grade, enterprise-ready.

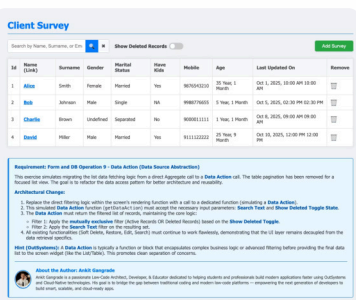

OmniShelf

A unified warehouse inventory reconciliation tool

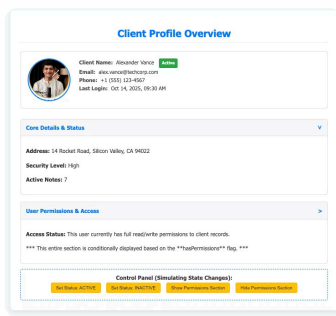

DEXPO

An Import-Export business management suite

Sample Exercise

12 User Stories to build a complete Client Survey feature

Sample Exercise

30+ such real world sample use cases to understand the real development challenges

What You Become After 8 Weeks

Enterprise-Ready Developer

Build and deploy real OutSystems applications on ODC + OS11 – not sandbox demos.

Real-World Builder

A portfolio of enterprise-grade apps you can confidently walk through in any interview.

Interview-Confident

Capable of clearing real OutSystems interviews – not just mock rounds

Production-Ready from Day One

Contribute to live enterprise projects immediately – no ramp-up time needed.

THIS IS WHAT YOU CAN BECOME

Roles You Can Target Immediately After This Program

1

**OutSystems
Developer**

2

**Low-Code
Developer**

3

**Enterprise
Application
Developer**

Batch Details

Duration

8 Weeks

Mode

Live Weekend Sessions

Time

8:00 AM IST

Start Date

May 2, 2026

This is for developers who are done consuming and ready to start building

If you don't build real systems now, you'll keep competing with thousands of tutorial-level developers.
